ACADEMIC ACHIEVEMENTS

2017 – Present	**The University Of Salford**
	BSc Computer Science w/ Web Development & Placement Year
	2:1 (62%) – Year 1
	Currently (71%) -Year 2

Modules:	**Database Systems (69%), Network & Security, JAVA Programming (55%), Computer System Internals & Linux (45%), Client Server Systems, Web Development & HCI (76%), UX Engineering, Careers Dev, Software Projects with Agile Techniques, Design Patterns.**

- Developed good full stack web development skills using JavaScript, CSS with common frameworks such as Bootstrap 4 for the front end. Experience working with PHP (+Frameworks such as Laravel) and some basic NodeJS. I am constantly improving these skills daily through numerous groups, personal & individual university projects.

- Good understanding of object-oriented programming mostly in JAVA/C#. Gained from the Programming module & intense group code camps. Developed SQL knowledge through home studying. I have also gained a good understanding of design patterns such as MVC which helps develop a more structured work flow that other developers can understand

- Intermediate understanding of cyber security using Linux Kali & improving rapidly from Network penetration module that is still in progress.

- Improved on problem solving skills and technical skills, alongside demonstrating the ability to work well in a team, communicate effectively while also working strict deadlines.

- Member of the Computer Science society participated in group problem solving takes whilst meeting and socialising with other students from students from different courses.

2015 - 2017	**Salford City College**
	BTEC Level 3: Information Technology **(DDM)**

2009 – 2014	**Manchester Creative and Media Academy**
	6 GCSEs (1A, 2B, 3C) Including Maths & English at **B**

THABO MOYO

WORK EXPERIENCE & SKILLS

Online courses

During my spare time, I take part in online courses to help improve my technical understanding or if the University does not cover a specific topic I would like to learn. The most recent course I took part in is 'Cyber security' on a paid subscription hosted by **Lynda.com**. This course gave a better understanding of cyber security by demonstrating why it is so important to keep data safe, how easily organisations can be attacked if the correct security procedures are not followed and how it can potentially trigger a GDPR/Data protect Act persecution. This has made me a lot more cautious when developing anything and consider possible security threats.

2018/09 – Present

Argos Ltd, Salford
Delivery Driver / Customer advisor

- Managed the stores database with basic SQL Queries to make sure all goods were delivered to correct address on time.

- Working with team to achieve shift targets & minimising mistakes
